### BSc

University Of Allahabad

05/2012 - 06/2015

Courses

- BSc

## WORK EXPERIENCE

### Software Engineer

Mihuru

09/2022 - Present

Fintech Company

Achievements/Tasks

- Increased efficiency of some of the APIs and made them faster by modifying database structure. Identified frequently used columns on some of the tables and created indexes to make the queries fast.
- Identified the APIs with slow response time and enabled caching on some of them to make them fast and scalable.
- Developed a module to generate PDF documents given data in JSON format. It is being widely used to generate credit reports of customers by the business team. This increased the productivity of the business team by almost 90%.
- Build APIs and web-hooks to integrate with major travel agencies in India. These APIs allow customers to apply for loans on Mihuru's platform directly from the payment page of several travel platforms.
- Developed an internal tool for the business development team to quickly check customer history and get all the relevant information about a customer in CSV as well as JSON format.
- Completed maintenance on existing programs
- Created a APIs to fetch current status of loans for any customer and also record the inflow and outflow of cash per EMI and push them to a general ledger.
